THE PATIENT GUARD® SYSTEM  
2020 Catalog

USE PRECAUTION

***Protect patients, warn visitors, help staff  
remain alert – everyone must play their part!***

## WHAT IS IT? HOW DOES IT WORK?

The Patient Guard® system is an efficient visual warning device which can be used to clearly display which patient areas are under isolation. Flexible and easy to use, it can also highlight recent outbreaks, reinforce hand hygiene, and advise visitors regarding best practice.

This system consists of a comprehensive library of message cards which staff can change to visually broadcast the level of isolation within patient care areas. Staff choose the most appropriate message card and fix it to an unobtrusive rail-based display system, mounted on door frames, entranceways and passageways. Newly-emerging isolation areas can therefore be quickly highlighted to staff and visitors.

## EASY TO USE

Our message cards, or inserts - printed on lightweight yet robust card - are colourful, eye-catching and quick to attract attention.

They can be readily disposed of following use, reducing cross-contamination. Cards are easy to store and carry, and can be installed using one hand.

## COST-EFFECTIVE AND SIMPLE TO INSTALL

The Patient Guard® System, while elegant, has been designed for maximum visual impact using easy-to-use, cost-effective components. Installation is simple and swift, requiring minimal technical expertise and no special tools

## EASILY UNDERSTOOD

Having worked in infection control and signage for several decades, we understand that visitors are often anxious when visiting the hospital, and can feel overwhelmed by the extensive signage displayed within healthcare environments.

The Patient Guard® System's highly visual messaging is large and bright, and stands out from the crowd helping visitors and staff to absorb and respect its potentially lifesaving communication.

## PART OF A FAMILY

The Patient Guard® System is part of Tagg Design Inc's family of infection control communication products.

Since 2005, hospitals have been using our Tagg Clean-Hands® Sanitizing Stations and corresponding library of signage, templates, visual symbols and other communication products in entrance areas, healthcare lobbies and clinics.

The sanitizing stations make use of the same symbols as the Patient Guard® inserts and work together, flawlessly, to help achieve rapid message recognition, better compliance, and lower levels of infection spread.

Protect your patients, healthcare staff, long-term care residents and visitors with the Patient Guard® System.

# Patient GUARD®

## THE PATIENT GUARD® SYSTEM

It's a one-of-a-kind messaging and warning system designed to isolate patient rooms - but also announce outbreaks, instruct visitors to wear precautions and reinforce hand hygiene. It's a deceptively simple system: display rails get mounted on every door frame or passageway. Then when needed, an appropriate insert is hung from the display rail.

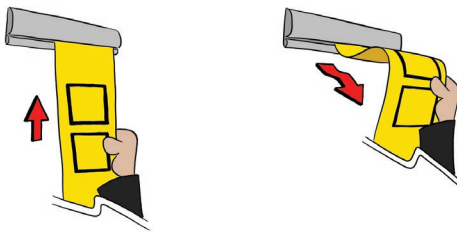

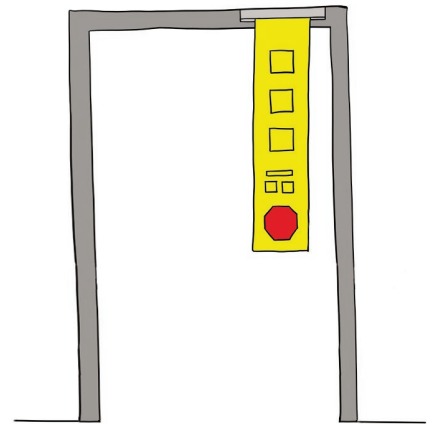

- costs little to install and deploy
- gets in people's faces without getting in their way
- makes sure that everyone respects isolated areas
- requires next to no training to use

## PATIENT GUARD® INSERTS

Choose from our selection of infection control messaging inserts to help you warn those entering and leaving your controlled spaces.

- full-colour 2-sided poster inserts (6"W x 36"H)
- translations available
- 250 cards per box
- card stock - disposable, recyclable & write-able

*Complete insert selection found on pages 4, 5 and 6*

## PATIENT GUARD® INSERT MOUNTING SYSTEM

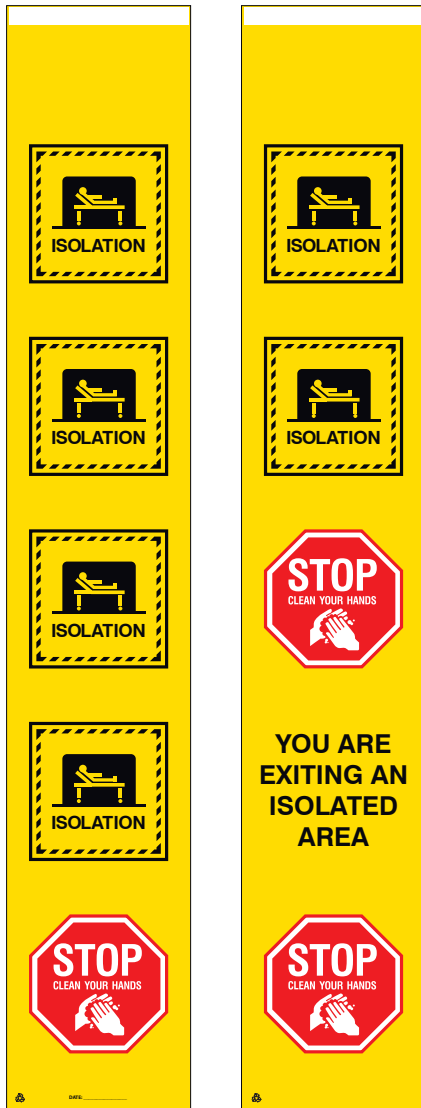

- Unobtrusive plastic display rail system
- Measures 12"W x 1.5" H to hold up to 2 inserts at a time
- Quick and easy to install using pre-applied two-sided tape
- Allows for single-handed card insertion – inserts hang securely
- Supplied in packs of 10; bulk orders available
- Display rails may not be exactly as shown
